Please select one answer for each question

1 Eye protection must be worn:

- Only when working at a machine.
- At all times when working in the woodshop.
- When shop supervisor/monitor reminds me.

2. Proper footwear for the woodshop is:

- Work boots.
- Sandals
- Footwear must cover the toes, heel and top of foot.

3. Those persons allowed to work in the shop are:

- Anyone with previous experience.
- Only individuals that have completed the safety and training program.
- All of the above.

4. Equipment and tools available to use are:

- Only machines, equipment and tools that I have been properly trained on.
- Any tool in the shop.
- Any machine or tool that I can figure out how to use on my own.

5. Materials are not provided, except for:

- Anything I can find in the shop.
- Materials left on workbenches.
- Any material in the bins below the miter saw table and in barrels marked FREE.

6. The FIRST priority when working at a machine is:

- That I don't make any mistakes.
- I am always thinking about safety.
- I watch what others are doing around me.

7. Before turning on a stationary machine:

- Turn on your iPod so you can't hear the machine.
- Turn on the dust collection system or confirm that it is on.
- Let everyone know that you are starting-up a machine.

8. On the bandsaw, the correct blade guard setting is:

- 1/8 - 1/4 inch above the material.
- Holding material tight against the table.
- The guard can be placed any height above the material.

9. When holding material at the miter saw, the safety zone is:

- Anywhere, as long as I am holding firmly.
- As far away from the blade as possible.
- Six inches away from the blade.

10. When using the sanding machines it is best to:

- Know the direction the sandpaper is going.
- Hold the material firmly.
- All of the above.

11. When sanding material at the disc sander I will sand on the:

- Down side of the disc.
- Either side of the disc.
- Top side of the sanding disc.

12. When using the small air-powered sanders I should:

- Take the sander to a workbench to use.
- Tell others to "stand back".
- Turn on the downdraft table and complete my sanding tasks there.

13. When using the drill press I need to remember to:

- Make sure long hair is tied back.
- Hold the material firmly while drilling.
- All of the above.

14. While using the air-powered nailer, I need to:

- Check that I am using the correct size (length) nail.
- Ensure my fingers are not in the path of the nail while firing.
- All of the above.

15. I can use my phone and/or text in the woodshop when:

- I am not using a machine.
- Never.
- The supervisor/monitor can't see me.

16. I understand that if I do not follow safety rules and procedures I will:

- GREATLY increase the possibility of injury.
- Lose my privilege to work in the woodshop.
- All of the above.
